

SOWgp repeat array variability (full-length copies ≥ 250 aa; units anchored on PTDCYGDC; aligned: projected onto modal unit)

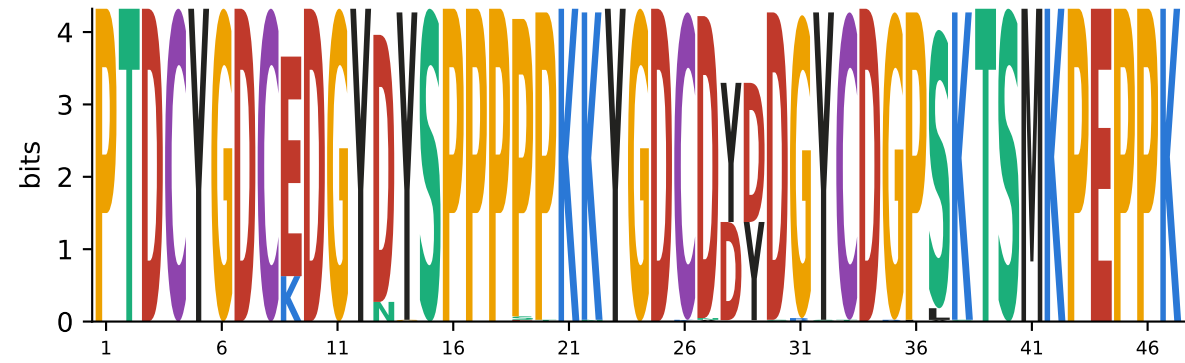

(a) 79 distinct sequences (206 copies); blocks = anchored 47 aa units

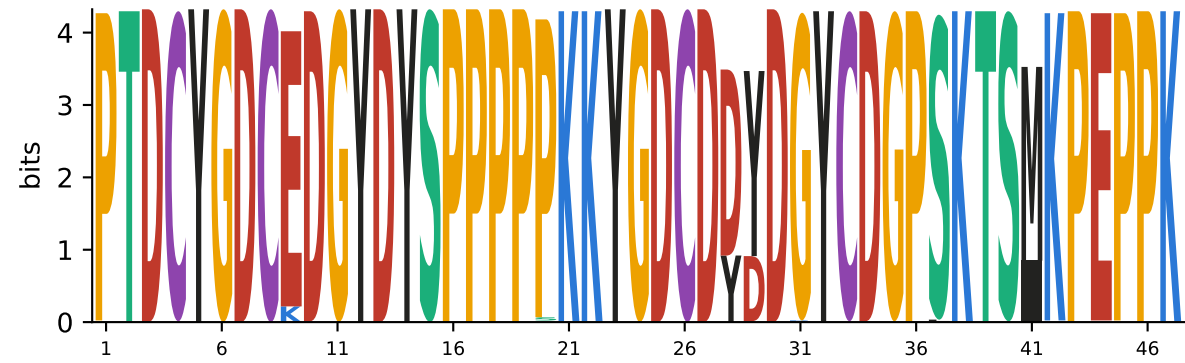

(b) unit-count distribution

(c1) immitis: internal units (n=175), position within aligned unit

(c2) posadasii: internal units (n=371), position within aligned unit

(d) aligned units vs modal internal unit: blue = same, orange = differs, grey = gap
rows grouped by species and unit class; groups < 8 units unlabelled
